ABOUT ME

Full-stack software engineer with hands-on experience across industrial automation, strategy consulting internships, marketplace products, and ERP platforms.

EXPERIENCE

Full-Stack Developer

Levare

Jan 2026 – May 2026 | Remote

- Built custom client web applications inside a software development house, covering APIs, business logic, and React interfaces.
- Delivered integrations between new products, external services, and client-side internal systems.
- Supported releases, fixed bugs, and added monitoring, analytics, and administration tools.

Full-Stack Developer

Ayuniqa

Jun 2025 – Jan 2026 | Israel – Hybrid

- Built backend services and admin interfaces for a slots-game platform and its internal operations.
- Implemented Node.js and MongoDB services for game catalogues, user flows, and content management.
- Delivered React dashboards and realtime tools for support, QA, and product operations.

Software Development Intern

CTR Strategy

Dec 2024 – Mar 2025 | Remote

- Built utilities for the marketing team, covering campaign reports, data processing, and task visibility.
- Supported technical work on funnels, landing pages, and client websites for ads, SEO, and email marketing.
- Wired forms, event tracking, and small backend scripts for analytics and operational reporting.

Automation & Embedded Systems Engineer

AZTPA

Jun – Aug 2023; Jun – Aug 2024 | Russia

MY LIFE PHILOSOPHY

“Where code meets creativity, innovation wakes up.”

MOST PROUD OF

🏆 Competitive Programming
Top-200 Programmers in Russia

🏆 Finalist
Yandex National Programming Olympiad

PROGRAMMING LANGUAGES

C/C++ Rust Python JavaScript SQL

FastAPI React Axum Flask WebAssembly
Docker MongoDB

PyTorch OpenCV YOLOv3 GNNs PPO
Reinforcement Learning

Docker Git WebSocket Redis GraphQL
REST API Uvicorn SQLite

PLC Programming Embedded Systems
Multi-GPU Training

STRENGTHS

Reliable Driven Curious Inventive
Tech-Savvy Collaborative

LANGUAGES

English ●●●●●

- Built production tools for industrial valve manufacturing.
- Worked with PLCs, sensors, and equipment diagnostics to monitor production-unit state.
- Maintained internal web tools for production data, documentation, and administrative exchange.

PROJECTS

ERP365

- Smart-contract system for paying contracts in crypto. Developed auth (sign-up/login), document upload, email delivery, event handling, contract creation, frontend flows, and reporting.

Ozon

- Hackathon project: AI for last-mile delivery optimization, including courier routes, order flow, and operational analytics. Used graph neural networks, Actor-Critic algorithms, and an attention-based decoder.

P2P Chat

- Decentralized chat where clients act as nodes and exchange messages directly without using servers. All logic runs on client devices. Server-side and client-side parts.

Gordex

- Online marketplace: API, web interfaces, users, listings, orders, and admin panel. Server-side and client-side parts.

Russian

Hebrew

EDUCATION

B.Sc in Computer Programming

National University of Science and Technology

Sep 2023 – Sep 2027

Grade: 2 year

Focus: Systems Programming, AI, and Applied Machine Learning.

HOBBIES

Chess

- Active chess player: 1800 on Chess.com.
- It enhances my strategic planning, foresight, and decision-making under pressure.

Volleyball

- 5 years of playing, 3 years on school team.
- It fostered my teamwork, communication, and adaptability in dynamic environments.

Tutoring

- Mentoring peers and junior developers to build technical understanding, communication, and leadership skills.
